Disclaimer colours:

The basic HI-MACS® material is identical for every colour but it is important to note that **darker and more heavily pigmented colours** will show dust, scratches, haziness, marks left by hard water and other ordinary wear and tear more noticeably than lighter textured colours. Therefore colours marked with a (*) are less suitable for applications that are exposed to extensive surface contact such as worktops located in heavy traffic area as an example.

Due to specific characteristics and properties of the **Marmo colours, which have a veined effect**, special consideration has to be taken into account with jointing and the use of covered up-stands. Veining may vary from sheet to sheet.
